

There are a few facts to consider when having an

Farm Auction Sale!

First, you must have a crowd.
Second, you get somebody to treat them well when they get there.
You do not make a mistake when you leave it to me to serve lunch at your sales. I am fully prepared to do that part of the work in a most satisfactory manner.

Yours truly,

LITTLE CHICAGO, F. C. Schroeder, Mgr.

THE LEADER.

EVERY ONE MAY KNOW THE DELIGHT OF USING A PERFECT RANGE!
The Malleable
PAYS FOR ITSELF.

Every woman would like to have a perfect range—one that would turn out beautifully browned loaves of bread, cake and pies, baked just as much on one side as another.

But some do without this pleasure because they can't afford it.

It's not true economy to keep on using that old range or cook stove—nor to buy that common steel range because it costs a few dollars less than a Malleable.

Buy **THE MALLEABLE RANGE** and It Will Pay Back Its Own Cost

By the use of unbreakable Malleable Iron in place of the brittle cast iron found in the ordinary type of "Steel Range," the Malleable is built with every seam practically air tight. The leakage of air that causes excessive fuel waste is thus done away with so that the Malleable will require but little more than half the fuel needed by a range of the common sort. With bills cut in two, it's easy to see how the Malleable "Pays for Itself." It does better work too—always.

We Can Prove These Things to You!

LET US show you how the Malleable is built—riveted like a steam boiler.

LET US show you how the Malleable Iron in Malleable Ranges will withstand intense heat that would burn up the grey iron in common ranges.

LET US demonstrate all of these things and the hundred and one other Malleable features that go to make up range perfection.

THEN YOU will realize how it is that the Malleable would do your work with less fuel, less time, less labor than are now required.

OCT. 12 To 17 Is Our Big Exhibit,

and a special agent from the factory will be here, and with every range purchased that week you will receive **Free \$7.50 Utensils.**

Talk about big corn! Don Brindley brought three ears to this office Monday that are large enough for fence posts. Well, that may be stretching it a little, but they do measure 16, 15 and 14 inches in length, and the kernels run the entire length of the cob. Don says he has 79 acres of just such corn that he planted and tended all himself.
